

# IM3000 Visitor - Vendor Control Station

A WHOLLY-OWNED SUBSIDIARY OF INTELLI-CHECK-MOBILISA, INC.™

Military installations and secure facilities across the country use Defense ID® - the world's most advanced Access Control - Force Protection tool.

The Defense ID® IM3000 Visitor/Vendor Control Station gives full positive-access control and provides a complete security system when coupled with the Defense ID® IM2500 Sentry Handheld and IM2100 Agent Handheld.

## The Defense ID® System -

### Catches Bad Guys

Conducts Instant Background Check

### Pre-populate Fields

Scan Government-Issued ID card to quickly fill out form

### Print FIPS-201 Badges

### Advanced ID Linking Technology

Use their own ID Card as Pass - Save on cost of printing new badges

### Full - Complete System

Works seamlessly with Handheld Scanners

## IM3000 Visitor/Vendor Control Station

The IM3000 Visitor/Vendor Control Station makes it easier to process visitors and vendors. The system pre-populates fields, takes photo, runs instant background check, prints badge and allows user to control visitor's or vendor's access by date, time, location or FPCON.

## Comparison of Capabilities

**Read electronic format of:**  
 Government Issued IDs  
 Military IDs  
 Installation Issued Badges  
 Drivers Licenses  
 Passports

**Instant Check for:**  
 National Wanted Lists  
 Law Enforcement Lists  
 Fake IDs  
 Expired IDs  
 Lost, Stolen, Terminated IDs

**Positive Identification:**  
 Entry Authorization List

**Verification:**  
 PIN Verify  
 Database Photo Match

**System Functions:**  
 Photo Capture  
 Web Preregistration  
 Restrict Access

**Card Issue:**  
 FIPS 201-Compliant  
 Use Current ID Card as Pass

The Defense ID® IM3000 Visitor/Vendor Control Station scans government issued ID cards to pre-populate badge fields to print FIPS-201 badges or, via linking technology, allows the visitor or vendor to use their existing military ID or driver's license as their badge.

An instant background check is performed on applicant. No need to wait 6 to 8 weeks for results. The user can select to restrict access by date, time, location and FPCON.

Defense ID® handhelds link to the IM3000 database and display registration photo whenever the ID card is scanned. The IM3500 Secure Web-Services option allows visitors to preregister with their sponsor via a secure, online process speeding registration.

The IM3000 Station is comprised of advanced software, desktop computer, 2D barcode imager, ID camera, badge printer, connectors, cables and starter kit of badge supplies.
